GO Frameless Balustrade Channels

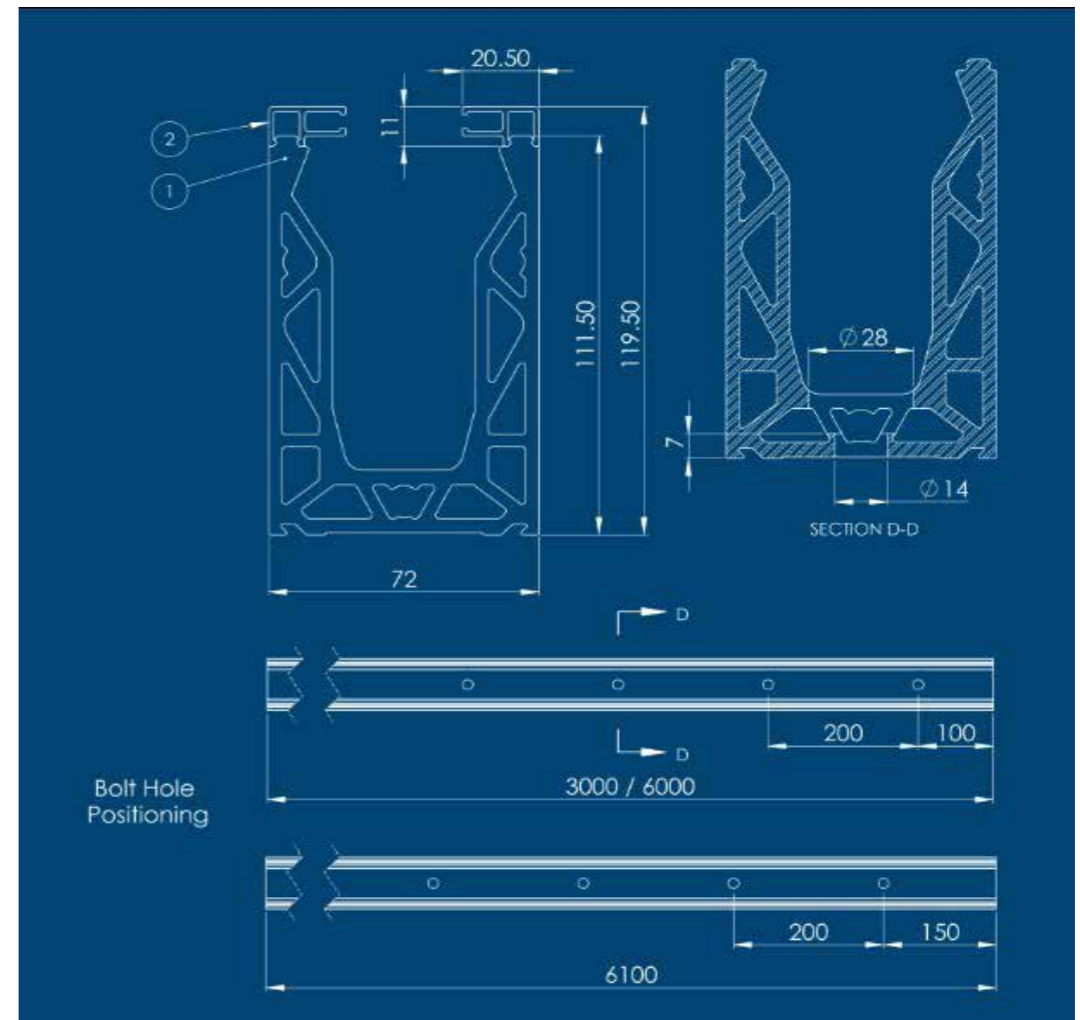

GO Frameless Channel

Essential Features

- Quick Installation
- Horizontal alignment from two side
- Suitable for 12-21.5mm glass thickness
- Lightweight and strong extruded aluminium
- Fully tested for upto 1.5k/N loading requirements suitable for both domestic and commercial use
- Dry Glazed balustrade system
- Various finishes including stainless steel finish and RAL Colours
- 3 meter Stock Length

Go Frameless balustrade channel is one of the most technically advanced aluminum balustrade systems on the market today. Easily identified by its characteristic triangular-hollowed core, which provides an incredible strength to weight ratio.

Go Frameless channel is able to achieve up to 1.50kN line load resistance when used with glass panels up to 1200mm high, making it a highly adaptable balustrade system suitable for use as edge protection in both domestic and commercial installations.

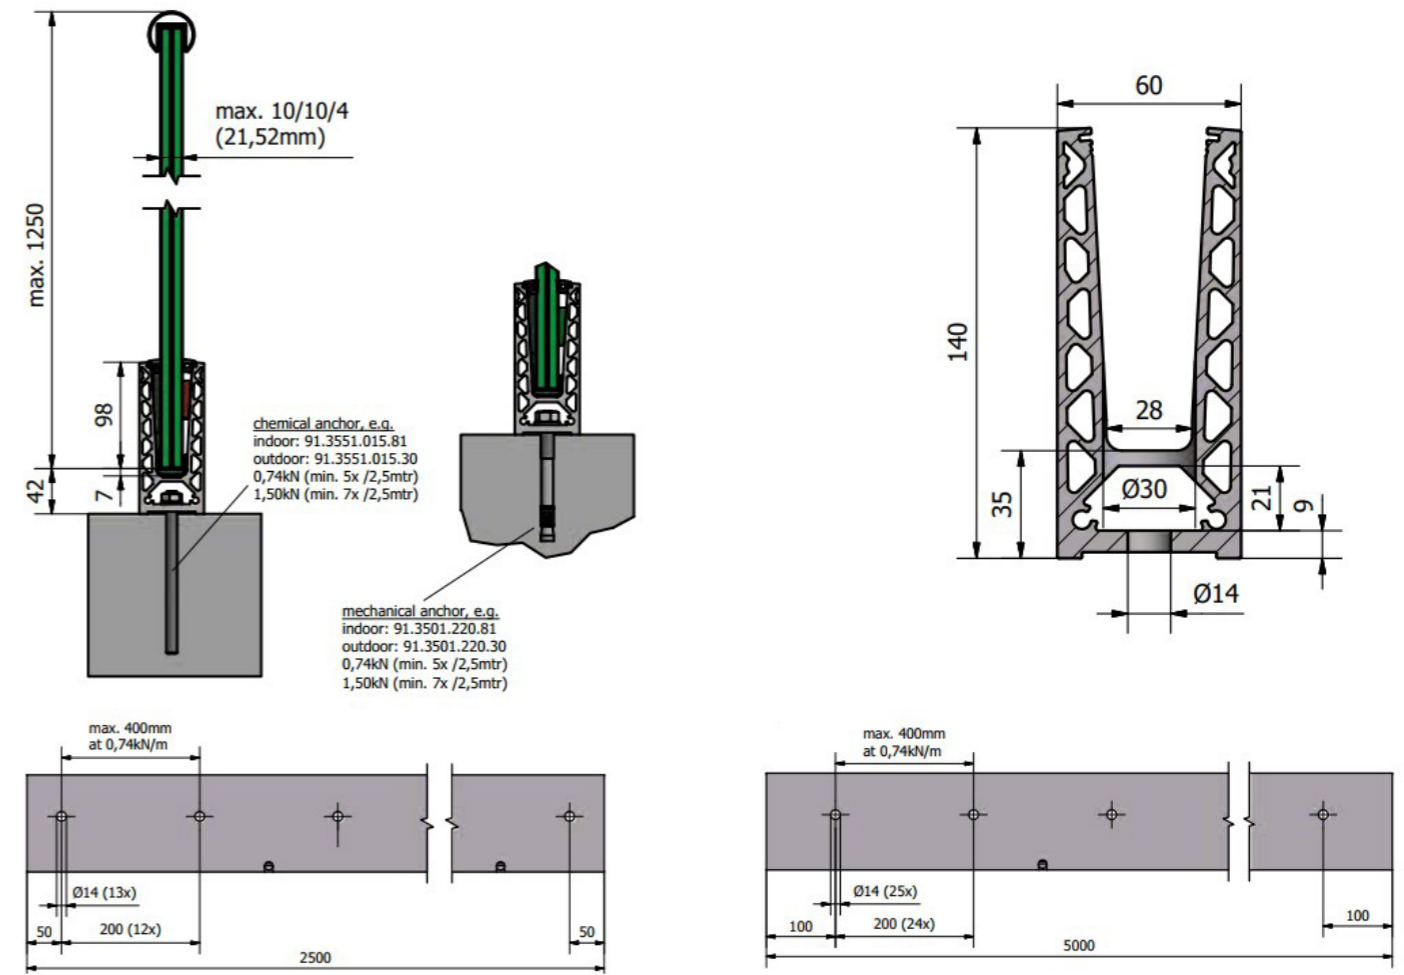

GO Frameless PRO Channel

Essential Features

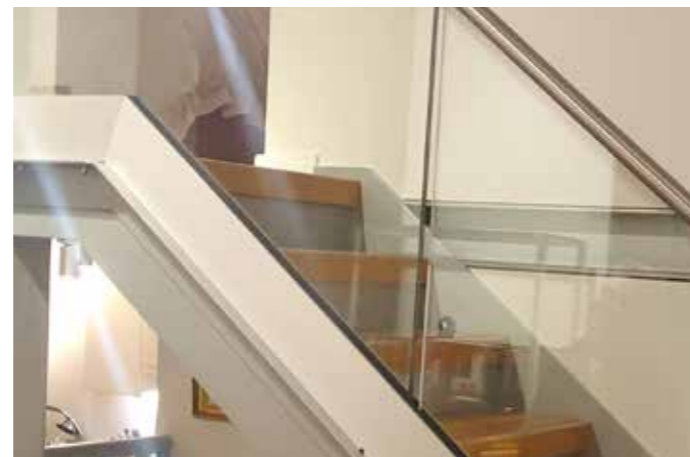

- Slimline, elegant design
- Horizontal alignment from one side
- Low maintenance
- Suitable for 12-21.5mm glass thickness
- Lightweight and strong extruded aluminium
- Fully tested for upto 1.5kN loading requirements suitable for both domestic and commercial use
- Various finishes including stainless steel finish with other popular powder coated colours on request
- 2.5 meter & 5 meter lengths

Go Frameless PRO balustrade channel has a slimline design with only 60mm width it can achieve line level load of 1.5kN with appropriate glass selection. Extremely fast and easy installation it can be installed from one side avoiding the need for scaffolding or hoists.

We can cut to your custom size requirements and supply this as a DIY kit or you can have our specialist team install for you in locations within the M25 Area of London.

GO Frameless PRO channels are versatile they can be top mounted, side fixed or recessed into floor.
